AMENDED

APPLICATION FOR PERMIT

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date	e of filing in State Engineer's Office				
Retu	rned to applicant for correction				
Cori	rected application filed. SEP 3-0-1980				
Мар	filed DEC 19 1985 under 41722				
AI	The applicant U.S. Government allistic Missile Office FRCE-MX, Norton Air Force Base of San Bernardino, Street and No. or P.O. Box No. City or Town Clip or Town Clip or Town State and Zip Code No.				
wate	ers of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorpora-				
tion;	; if a copartnership or association, give names of members.)				
	,				
1.	The source of the proposed appropriation is underground Name of stream, lake or other source.				
2.	The amount of water applied for issecond-feet One second-foot equals 448.83 gals. per minsecond-feet				
	One second-foot equals 448.83 gals. per min. (a) If stored in reservoir give number of acre-feet				
3.	— Opagi-Munigipal				
	Irrigation, power, mining, manufacturing, domestic, or other use. Must limit to one use.				
4.	f use is for: a) Irrigation (state number of acres to be irrigated)				
	(b) Stockwater (state number and kinds of animals to be watered)				
	(c) Other use (describe fully under "No. 12. Remarks")X				
	(d) Power:				
	(1) Horsepower developed				
	(2) Point of return of water to stream.				
5.	The water is to be diverted from its source at the following point: NE SE Section 27 T 1-N, R 45-E,				
	M.D.B.&M. At a point from which the SW corner of Section 34, T 1-N, R45-E Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land,				
	Bears S 34 47'18" West at a distance of 9111.98 feet. it should be stated.				
6.	Place of use Ralston Valley; includes only federally owned land within Describe by legal subdivision, if on unsurveyed land it should be so stated.				
	designated place of use. (See Attachment B)				

	Use will begin about January 1 and end about December 31 , of each year. Month and Day Month and Day				
8.	Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and				
	specifications of your diversion or storage works.) Diverted through pipes for				
	construction purposes from a drilled well State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits.				

9.	Estimated cost of works approximately \$250,000						
10.	Estimated time required to construct works. One (1) year						
11.	Estimated time required to complete the application to beneficial use Two (2) years						
12.	12. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or a consumptive use.						
	See Attachment A for explanation of total annual quantity of ground water						
	requested for the basin and its intended use.

The attached application for the appropriation of ground water is for the purpose of supplying water for the construction and operational phases of the MX Missile System in Ralston Valley. The attached application is one of eight for appropriation of ground water in the valley. Each application is for 519 acreground water in the valley. Each application in a total quantity of the ground-water basin. This is a supply acrefeet per year for the ground-water basin. This is a supply acrefeet per year for the ground-water basin. The bear equired annually during the construction period. The bear equired annually during the construction period. The struction period within a span of five years beginning in 1984 struction period within a span of five years beginning in 1984 struction period within a span of five years beginning in 1984 construction plant and camp are expected to commence about one and ending in 1989. Construction of roads and a possible construction plant and camp are expected to commence about one one-fifth of the 4152 acre-feet figure. Ground water required one-fifth of the 4152 acre-feet figure. Ground water required shelter construction is included in the 4152 acre-feet for for road construction is included in the 4152 acre-feet for ground-water use is expected to be less than 300 acre-feet per ground-water use is expected to be less than 300 acre-feet per year. This reduced quantity of ground water will be needed year. This reduced quantity of ground water will be approximately for the life span of the system which will be approximately the present the system which will be approximately the present the system which will be approximately and the system which will be approximately the present the system which will be approximately th

The ground water for construction will be used for road compaction, dust suppression, shelter construction, miscellaneous structures, and possibly construction plants and camps. Ground structures, and possibly construction plants and camps. and water for the operational phase will be used for maintenance and surveillance facilities personnel as well as other possible support systems.

The place of use of the ground-water, as indicated on the attached water rights survey map, covers the entire valley in anticipation of the probably broad areal extent of construction planning activities. It is possible that once the construction planning has been completed, a request may be filed to change the point of diversion on the attached application to a more strategic of diversion on the attached application to a ground location, however, the above stated total quantity of ground water will remain the same.
